Pen Cat Drawing: Contour, Line Weight, and Hatching

Original tasks 1, 2 / independent work

Task 1

Draw a cat head only (no body) with a light source from the upper right. Use thin lines on the top and left, thick lines on the right and underside, and hatch the right side with lines parallel to the head curve. State your convention.

Task 2

Draw a cat tail curling to the left. Use thin lines on the outer curve and thick lines on the inner curve. Hatch the inner curve with lines parallel to the tail's curve. State your convention.

Pen Cat Drawing: Contour, Line Weight, and Hatching

Original tasks 3, 4 / independent work

Task 3

Draw a cat paw with four toes. Use thin lines on the top of the paw and thick lines on the bottom and between the toes. Hatch the bottom with short vertical lines. State your convention.

Task 4

Draw a complete seated cat with a light source from the upper left. Use thin lines on the top and back, thick lines on the underside and paws, and hatch the right side and underside with lines parallel to the nearest contour. State your convention and list three thick lines with their reasons.
