Dragon Pen Drawing: Scale Hatching and Wing Texture

Topic reference / ordinary illustration

Ordinary topic reference. Hypothetical dimensions in the four tasks are supplied in their own text; this illustration is not their measured answer.

Dragon Pen Drawing: Scale Hatching and Wing Texture

Worked example / complete source key

A dragon body is 20 mm tall and 30 mm wide. You divide it into three horizontal bands of equal height. In the top band you draw 4 mm strokes spaced 3 mm apart. How many strokes fit across a 30 mm width in the top band, assuming each stroke plus gap uses 7 mm?

Answer: Four strokes, with 2 mm left over. Each stroke plus gap uses 4 mm + 3 mm = 7 mm. 30 mm divided by 7 mm equals 4 full strokes (28 mm) with 2 mm remaining.
