Draw a Fantasy Map: Coastlines, Terrain Symbols, and Legend

Original worked example / unchanged complete key

Prompt: A map frame is 15 cm by 20 cm. The legend box is 4 cm by 6 cm and sits outside the frame. The map uses four terrain symbols: mountain, forest, swamp, and desert. The coastline is one closed contour. Check the legend-to-map consistency and the frame area.

Answer: Frame area is 15 times 20 equals 300 square centimetres. Legend area is 4 times 6 equals 24 square centimetres. The legend is outside the frame, so the map drawing area remains 300 square centimetres. Consistency check: list the four symbols and confirm each appears at least once inside the land region and once in the legend. If all four match, the legend is consistent. Coastline check: trace the single closed contour without lifting your finger; if it is continuous, the coastline passes.
