French Braid Drawing: Strand Overlap Sequence

Original worked example / unchanged complete key

Prompt: Draw a four-overlap French braid using the convention R over C, L over C, alternating. Label each overlap and state the center strand after each step.

Answer: Overlap 1: R over C; center becomes R. Overlap 2: L over C; center becomes L. Overlap 3: R over C; center becomes R. Overlap 4: L over C; center becomes L. The outer strand sequence is R, L, R, L, and each overlap moves the outer strand to the center.
