Simple Husky Drawing: Contour, Fur and Ear Practice

Original worked example / unchanged complete key

Prompt: Draw a simple husky facing right with a light head oval, a smaller muzzle oval, two upright ears, a rounded body, four legs and a curved tail. Add cheek fur curving outward, chest fur flowing down and back fur following the spine. Use short strokes with small gaps.

Answer: A completed simple husky drawing with a smooth continuous contour, two upright ears attached to the head, and three fur patches whose strokes follow the local body form. The outer contour is darkened only after the light construction lines are checked.
