Male Anime Base: Head-Unit Ratio and Limb Block-In

Topic reference / ordinary illustration

Ordinary topic reference. Hypothetical dimensions in the four tasks are supplied in their own text; this illustration is not their measured answer.

Male Anime Base: Head-Unit Ratio and Limb Block-In

Worked example / complete source key

A student draws a male anime base seven head units tall. One head unit measures 3 cm. The chest box spans from the second to the third unit boundary, and the pelvis box spans from the third to the fourth. The student measures the total height as 20 cm. Identify the error and state the correct total height.

Answer: The correct total height is 21 cm because seven units times 3 cm equals 21 cm. The measured 20 cm means the units are uneven or the count is wrong. The student should re-step the head units along the center line and adjust the chest and pelvis boxes to the corrected boundaries.
