Monochromatic Landscape Drawing: Single-Hue Value Steps

Topic reference / ordinary illustration

Ordinary topic reference. Hypothetical dimensions in the four tasks are supplied in their own text; this illustration is not their measured answer.

Monochromatic Landscape Drawing: Single-Hue Value Steps

Worked example / complete source key

A landscape has three bands: sky, land, foreground. Using a 1–5 value strip, plan values so the sky is lightest and the foreground is darkest, with each adjacent band differing by at least one step. State the values and the differences.

Answer: Sky = 1, land = 3, foreground = 5. Differences: sky to land = 2 steps; land to foreground = 2 steps. All adjacent differences are at least 1, and the sky is lightest while the foreground is darkest.
