Draw a Kneeling Person Praying: Clasped Hands and Posture

Topic reference / ordinary illustration

Ordinary topic reference. Hypothetical dimensions in the four tasks are supplied in their own text; this illustration is not their measured answer.

Draw a Kneeling Person Praying: Clasped Hands and Posture

Worked example / complete source key

A learner draws a head oval 3 cm tall, a torso rectangle tilted forward, a leg trapezoid with both knees on the ground line, and a hand block 1.5 cm wide at chest height. The hand block sits 1 cm left of the midline. Check the drawing against the convention.

Answer: The head and torso are acceptable because the torso tilts forward. The leg trapezoid is acceptable because both knees touch the ground line. The hand block is too far left: it should be centered on the midline. Move the block 1 cm right so it sits between the shoulders. The hand width of 1.5 cm is half the head height, which matches the convention.
