Prom Drawings: Compose Dancers, Decorations, and Hall Depth

Original worked example / unchanged complete key

Prompt: On A4 paper, plan a prom scene with a horizon at mid-page, a trapezoid dance floor, three depth bands, five dancers (two near, two middle, one far), a far-zone balloon arch, and ceiling streamers. Use near height 8 cm and far height 4 cm as hypothetical examples.

Answer: Draw the horizon across the middle. Below it, draw a trapezoid: near edge 18 cm, far edge 10 cm. Mark near, middle, and far bands. Sketch two near dancers at about 8 cm tall, two middle dancers at about 6 cm, and one far dancer at about 4 cm. Stagger positions and overlap one near dancer with a middle dancer. Add a small balloon arch at the far zone and curved streamers in the ceiling zone. Darken final lines and check scale and overlaps.
