Realistic Tank Drawing: Tracks, Turret, Hull and Shading

Original worked example / unchanged complete key

Prompt: Draw a tank whose hull is 12 link-units long, with a top track run of about 14 link marks (roughly 1.2:1 when rounded), a turret width half the hull width, and light from upper left. Shade the lower turret and track interior dark. All numbers are hypothetical examples.

Answer: Hull box drawn with sloped front and flat deck, 12 link-units long; two parallel track loops with about 14 link marks on the top run (roughly 1.2:1 when rounded) and a matching count on the bottom run; road wheels on the ground line; turret ring ellipse on the deck; turret width half the hull width; barrel through the ring center; dark shading under the hull and inside the track loops, light on the top deck and upper turret.
