Round Face Drawing: Oval Guide and Feature Placement

Original task 1 / blank independent work

Task 1

On a 12 cm tall area, draw an oval 8 cm wide and 10 cm tall. Mark the eye line at 5 cm, nose line at 7 cm, and mouth line at 8.5 cm from the top. Place two eyes 2 cm from the midline.

Independent work / draw, calculate and label your response below.

Round Face Drawing: Oval Guide and Feature Placement

Original task 2 / blank independent work

Task 2

A student draws an oval 9 cm wide and 8 cm tall. Identify the problem and state a fix using the lesson convention.

Independent work / draw, calculate and label your response below.

Round Face Drawing: Oval Guide and Feature Placement

Original task 3 / blank independent work

Task 3

Given eye line at 4 cm, nose line at 6 cm, and mouth line at 7 cm from the top of a 9 cm oval, check the order and state whether placement is valid.

Independent work / draw, calculate and label your response below.

Round Face Drawing: Oval Guide and Feature Placement

Original task 4 / blank independent work

Task 4

Draw a round face with ears from eye line to nose line. Use an oval 7 cm wide and 9 cm tall with eye line at 4.5 cm and nose line at 6 cm. Describe where ears attach.

Independent work / draw, calculate and label your response below.
