Round Face Drawing: Oval Guide and Feature Placement

Original tasks 1, 2, 3 / complete keys

Task 1

On a 12 cm tall area, draw an oval 8 cm wide and 10 cm tall. Mark the eye line at 5 cm, nose line at 7 cm, and mouth line at 8.5 cm from the top. Place two eyes 2 cm from the midline.

Answer: Oval 8 by 10 cm with midline; eye line 5 cm, nose line 7 cm, mouth line 8.5 cm; eyes 2 cm from midline on the eye line.

Reason: The eye line is half of 10 cm. Nose and mouth lines are below it in order. Eyes are centered on the eye line.

Check: Measure oval height and width; confirm 5, 7, and 8.5 cm marks; check eye distance from midline.

Task 2

A student draws an oval 9 cm wide and 8 cm tall. Identify the problem and state a fix using the lesson convention.

Answer: The oval is wider than tall, so it is not a round face guide. Fix by making height greater than width, for example 8 cm wide and 9 cm tall.

Reason: The convention requires a slightly taller oval. Swapping width and height restores the guide.

Check: Compare width and height; height should be greater.

Task 3

Given eye line at 4 cm, nose line at 6 cm, and mouth line at 7 cm from the top of a 9 cm oval, check the order and state whether placement is valid.

Answer: Order is valid: eye line above nose line above mouth line. Placement is valid if features stay inside the oval.

Reason: The lesson requires eye line, then nose line, then mouth line. The given values follow that order.

Check: List the three marks from top to bottom and confirm the sequence.

Round Face Drawing: Oval Guide and Feature Placement

Original tasks 4 / complete keys

Task 4

Draw a round face with ears from eye line to nose line. Use an oval 7 cm wide and 9 cm tall with eye line at 4.5 cm and nose line at 6 cm. Describe where ears attach.

Answer: Ears attach at the oval edges between the eye line at 4.5 cm and the nose line at 6 cm.

Reason: The lesson places ears from eye line to nose line. The oval edges are the attachment points.

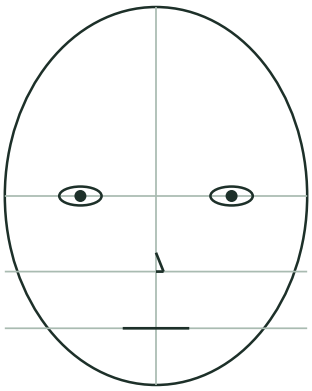

Check: Confirm ear marks start at 4.5 cm and end at 6 cm on both sides.

Round Face Drawing: Oval Guide and Feature Placement

Task 1 / answer measured construction

Task 1 / 8×10 cm oval with midline; eye line 5 cm, nose 7 cm, mouth 8.5 cm; two eyes 2 cm from midline on eye line.

Measured construction guide. Only labelled dimensions are fixed; use the original task for all other instructions.

width: 8 cm

height: 10 cm

eye from top: 5 cm

nose from top: 7 cm

mouth from top: 8.5 cm

eye offset: 2 cm

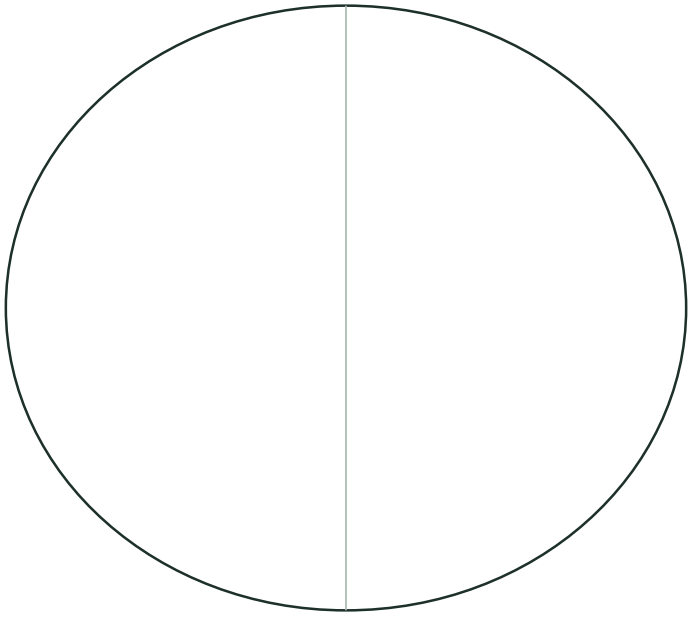

Printed physical lengths = source-labelled lengths x 1/2.

Round Face Drawing: Oval Guide and Feature Placement

Task 2 / answer measured construction

Task 2 / Original error: oval 9 cm wide by 8 cm tall (wider than tall). Corrected geometry: oval 8 cm wide by 9 cm tall (taller than wide).

Measured construction guide. Only labelled dimensions are fixed; use the original task for all other instructions.

width: 9 cm

height: 8 cm

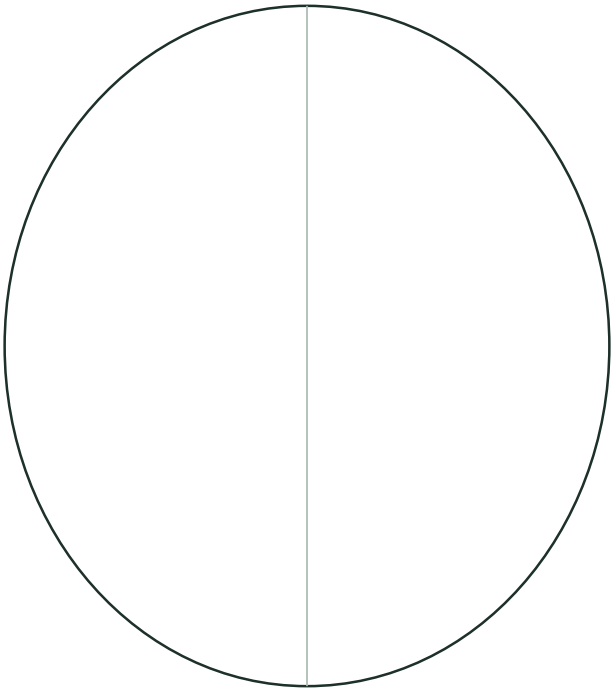

Printed physical lengths = source-labelled lengths x 1.

Round Face Drawing: Oval Guide and Feature Placement

Task 2 / answer measured construction

Task 2 / Corrected oval 8 cm wide by 9 cm tall.

Measured construction guide. Only labelled dimensions are fixed; use the original task for all other instructions.

width: 8 cm

height: 9 cm

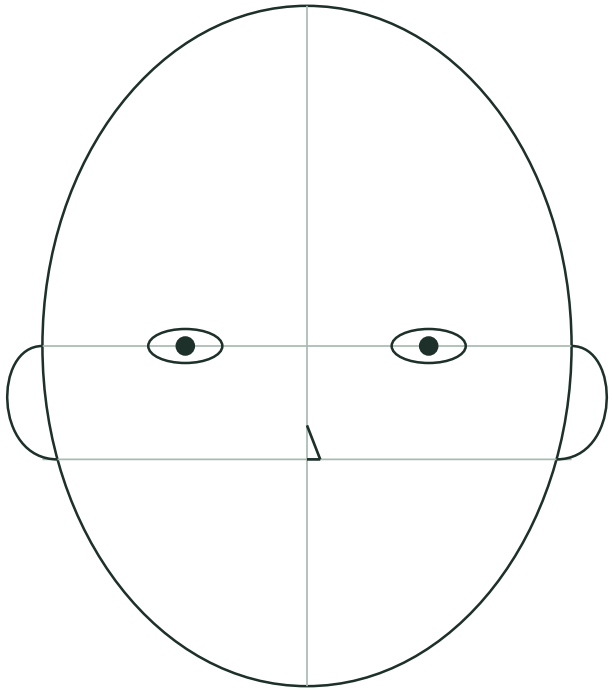

Printed physical lengths = source-labelled lengths x 1.

Round Face Drawing: Oval Guide and Feature Placement

Task 4 / answer measured construction

Task 4 / 7×9 cm oval; eye line 4.5 cm, nose line 6 cm; round ears attach at oval edges from eye line to nose line.

Measured construction guide. Only labelled dimensions are fixed; use the original task for all other instructions.

width: 7 cm

height: 9 cm

eye from top: 4.5 cm

nose from top: 6 cm

ear top from top: 4.5 cm

ear bottom from top: 6 cm

Printed physical lengths = source-labelled lengths x 1.

Round Face Drawing: Oval Guide and Feature Placement

Original rubric / reflection

- [ ] Oval is taller than wide and smooth.
- [ ] Vertical midline is present.
- [ ] Eye line, nose line, and mouth line are in correct order.
- [ ] Eyes sit on the eye line and inside the oval.
- [ ] Nose and mouth are centered on the midline.
- [ ] Valid alternatives in feature style are accepted if placement follows guides.

Reflection: What did you check, what did you change, and what will you try next?
