Draw a Skeleton with Joint and Limb Landmark Checks

Original tasks 1, 2 / independent work

Task 1

Hypothetical paper height 20 cm; skeleton height 15 cm. Divide into eight bands. Where should the knee joint sit, and what is the band height?

Task 2

A drawn upper arm measures 3.2 cm. Skeleton height is 16 cm. Using eight bands and a target of 1.5 bands, does it pass the 0.5 cm check?

Draw a Skeleton with Joint and Limb Landmark Checks

Original tasks 3, 4 / independent work

Task 3

In a front-view sketch, the left shoulder is 4.5 cm from the centerline and the right shoulder is 5.2 cm. The band height is 2.0 cm. Is the symmetry acceptable under a one-band-width rule?

Task 4

A wrist joint is placed 1.0 cm above the hip band. The band height is 1.5 cm. Does it pass the half-band landmark check?
