Smiley Face Variants: Eye and Mouth Expression Practice

Topic reference / ordinary illustration

Ordinary topic reference. Hypothetical dimensions in the four tasks are supplied in their own text; this illustration is not their measured answer.

Smiley Face Variants: Eye and Mouth Expression Practice

Worked example / complete source key

Draw one smiley using dot eyes and an upward curved mouth. Label the expression. Then draw a second smiley with the same head circle but open-circle eyes with centered pupils and a flat mouth. Label both.

Answer: First smiley: circle, two dots on the midline, upward curve below midline, label happy. Second smiley: same circle size, two open circles on midline with centered pupils, flat mouth below midline, label neutral. The head circle and eye spacing stay the same; only eye type and mouth curve change.
