Draw and Label a Horse Spur: Rowel, Shank, and Heel-Band

Original worked example / unchanged complete key

Prompt: A learner draws a side-view spur with a 3-unit heel-band, a 5-unit shank, and a 2-unit rowel with 8 spokes. The rowel label's leader line ends 2 units away from the wheel. Is the drawing fully valid?

Answer: No. The parts and proportions are acceptable, but the rowel leader line ends 2 units from the wheel, which exceeds the one-unit limit. Move the leader line endpoint to touch the rowel outline or come within one unit.
