Symmetry Butterfly Drawing: Half to Whole

Topic reference / ordinary illustration

Ordinary topic reference. Hypothetical dimensions in the four tasks are supplied in their own text; this illustration is not their measured answer.

Symmetry Butterfly Drawing: Half to Whole

Worked example / complete source key

A half-butterfly is drawn on the left of a vertical axis. The wing tip is 6 cm from the axis, the outer corner is 4 cm, the notch is 2 cm, and the body edge is 1 cm. Transfer these four points to the right side and state the order.

Answer: Mark the right-side points at 6 cm, 4 cm, 2 cm, and 1 cm from the axis, measured perpendicular to it. Connect them in the same order: wing tip, outer corner, notch, body edge. Fold along the axis to confirm each pair meets within the chosen tolerance.
