Draw an Owl Perched in a Tree: Branch Grip and Foliage Framing

Original worked example / unchanged complete key

Prompt: On a 20 cm by 25 cm sheet, draw an owl perched on a branch angled 10 degrees upward. Use a body height of 8 cm, head diameter of 4 cm, grip zone of 6 cm, and two foliage clusters of five leaves each. Show the grip clearly.

Answer: Branch line placed 12 cm from the top, angled 10 degrees up to the right. Grip zone marked 6 cm long. Body oval 8 cm tall and 5 cm wide at the shoulders, centered above the grip zone. Head circle 4 cm diameter overlapping the body top. Eye midline drawn across the head, beak below. Two feet inside the grip zone, each with one back toe and two front toes; branch line erased where toes cross. Tail drawn down and back. Foliage clusters at upper left and lower right, five leaves each, clear of face and grip. Final contours inked, construction lines erased.
