Eyes Drawing Styles: Cartoon, Anime, and Realistic Side by Side

Original worked example / unchanged complete key

Prompt: On a page with three equal columns, draw a shared baseline and midline. In the cartoon column, draw a bold upper lid and a large circular iris that touches the upper lid. In the anime column, draw a defined upper lid with a short eyelash line and a vertical oval iris. In the realistic column, draw an upper lid with a subtle fold and a circular iris slightly covered by both lids. Add one highlight per column: large for cartoon, sharp for anime, small and soft for realistic. Label each column.

Answer: The cartoon column shows a thick upper lid, a large iris touching the lid, and a large highlight. The anime column shows a defined upper lid with an eyelash line, a taller iris, and a sharp highlight. The realistic column shows a lid fold, a circular iris partly covered by both lids, and a small soft highlight. All three share the same baseline and midline, making the differences in lid thickness, iris shape, and highlight size easy to compare.
