Whimsical Flowers: Curled Stems and Stylized Petals

Original worked example / unchanged complete key

Prompt: Draw a whimsical flower with a 12 cm stem, one spiral curl, and five rounded petals. Bloom width 5 cm, petal length 3 cm.

Answer: A light S-curve stem from soil point to bloom center 12 cm apart, with a spiral curl of one full turn and decreasing radius near the middle. A five-petal bloom of width 5 cm at the top, each petal a closed rounded shape about 3 cm long with its narrow base at or near the bloom center and its tip pointing outward, small gaps between adjacent petal bases and sides, and a short neck line joining bloom to stem. Final lines darkened, construction marks erased.
