Realistic Apple Tree Drawing: Fruit, Leaves, and Bark Shading

Original worked example / unchanged complete key

Prompt: Draw a small apple tree study on a 15 cm by 20 cm paper. Use three main branches, two fruit groups of two apples each, and bark shading on the trunk only. Label your light direction.

Answer: A completed drawing shows a tapered trunk about 2 cm wide at base, three main branches forking into thinner twigs, two fruit groups each with two apples attached by short stems, leaf clusters of five to seven leaf shapes around each group, and short curved shading strokes on the shadow side of the trunk. Light direction is marked with a small arrow outside the drawing.
