Realistic Flying Eagle Drawing: Spread Wings and Feather Rows

Original tasks 1, 2 / independent work

Task 1

A practice sheet is 24 cm wide. The body center is at 12 cm and each wingtip is at 21 cm. What is the total wing spread?

Task 2

A wing envelope is 12 cm long from shoulder to tip. You plan three equal primary bands. What is each band length if they divide the envelope evenly?

Realistic Flying Eagle Drawing: Spread Wings and Feather Rows

Original tasks 3, 4 / independent work

Task 3

The body oval is 6 cm long and the head circle diameter is one-fifth of that. What is the head diameter?

Task 4

A feather band overlaps the row behind it by 2 cm. The band is 6 cm long. What fraction of the band is the overlap?
