Pencil Snake Drawing: Coil Spacing, Taper, and Head Construction

Original tasks 1, 2 / independent work

Task 1

A coil plan has four loops with gaps of 10 mm, 11 mm, 9 mm, and 16 mm. Mid-body width is 14 mm, neck 7 mm, tail tip 4 mm. State the spacing problem and one correction.

Task 2

A body outline is drawn with mid-body width 16 mm, neck width 15 mm, and tail tip 5 mm. Identify the taper error and describe the corrected widths.

Pencil Snake Drawing: Coil Spacing, Taper, and Head Construction

Original tasks 3, 4 / independent work

Task 3

A head is drawn as a single circle 20 mm across with the eye at the center. Describe two construction changes that would make the head read as a snake head.

Task 4

A tonal plan uses one heavy layer over the whole snake, making the head as dark as the body shadow. State the tonal problem and give a two-layer correction.
