Softball Glove Drawing: Pocket Outline and Lace Path

Original worked example / unchanged complete key

Prompt: Draw a glove outline with a pocket 4 units wide and 3 units deep, then plan a lace path with 6 numbered points from the thumb-side web to the little-finger edge. Use the lesson convention for line weight.

Answer: The glove outline has a palm 8 by 10 units, a thumb 3 by 6 units on the left, and four finger capsules of lengths 5, 6, 5, and 4 units. The pocket is a U-shape 4 units wide and 3 units deep between thumb and index finger. The lace path runs from point 1 at the thumb-side web to point 2 at the index base, then to points 3, 4, and 5 between fingers, ending at point 6 on the little-finger edge. Construction lines are light, the pocket is medium, and the lace path is dark. The path stays inside the outline and is continuous from 1 to 6.
