Draw a Stormy Sky: Layered Clouds and Rain Streaks

Original tasks 1, 2 / independent work

Task 1

A sky panel is 16 cm wide and 10 cm high. You place three horizontal guides at 3 cm and 6 cm from the bottom. Describe where the lower, middle, and top cloud bands go and which tonal key value each uses.

Task 2

You choose a rain direction 15 degrees from vertical. You draw ten streaks: six at 15 degrees, two at 30 degrees, and two vertical. How many streaks follow the chosen direction, and what should you do with the others?

Draw a Stormy Sky: Layered Clouds and Rain Streaks

Original tasks 3, 4 / independent work

Task 3

Under the lower band you place streaks 1 cm apart across 12 cm. Under the middle band you place streaks 2 cm apart across 12 cm. How many streaks are in each row, and which row is denser?

Task 4

Your lower band and middle band look equally dark. You want the lower band to be clearly darker. Name one adjustment and state how you would check it.
