Ocean Habitat Drawing: Layout Seabed, Reef, and Open-Water Zones

Original tasks 1, 2 / independent work

Task 1

Paper is 24 cm tall. Bands are 8 cm open water, 8 cm reef, and 8 cm seabed. A student draws a fish mostly in the reef band but its tail crosses into open water. Is the placement acceptable under the convention?

Task 2

A student labels the reef band but writes the label across the boundary line into open water. Band heights are 6 cm, 6 cm, and 6 cm on 18 cm paper. What should change?

Ocean Habitat Drawing: Layout Seabed, Reef, and Open-Water Zones

Original tasks 3, 4 / independent work

Task 3

A student draws five open-water animals in the top band and no reef animals. The reef band contains only the reef structure. Does the drawing meet the habitat-zone layout goal?

Task 4

Paper is 30 cm tall. A student uses bands of 10 cm, 10 cm, and 10 cm. They draw a seabed animal floating in the middle of the open-water band. What is the fix?
