Draw a Cute Three-Lobed Clover with a Face

Original worked example / unchanged complete key

Prompt: Draw a cute three-lobed clover about 8 cm tall with a face box 3 cm wide and 2 cm tall, eyes as two dots, a shallow smile, and a 3 cm stem curving slightly left.

Answer: Mark C. Draw a face box centered slightly below C. Draw three heart-shaped lobes with tips at C: one up, one lower left, one lower right, each about 4 cm wide at the widest point. Inside the box, place two dots about one eye-width apart and a shallow smile about 1.5 cm wide. Draw a stem from the bottom of the leaf between the lower lobes, curving left and about 3 cm long. Check that lobe widths are within about one pencil width, the face is centered, and the stem does not cross the box.
