Draw Celtic Interlace Bands and Spiral Motifs: Over-Under Construction

Original worked example / unchanged complete key

Prompt: Draw two bands that cross twice. Band A runs left to right; Band B runs top to bottom. At the first crossing, Band A goes over. At the second crossing, Band B goes over. Mark the ticks and describe the alternation on each band.

Answer: At crossing 1, tick Band A (over) and keep Band B's edge continuous. At crossing 2, tick Band B (over) and keep Band A's edge continuous. Band A reads over then under, so it alternates. Band B reads under then over, so it alternates. Both bands pass the alternation check.
