Draw a Crowned Portrait: Headdress, Profile Landmarks, and Drapery

Original worked example / unchanged complete key

Prompt: Draw a crowned profile portrait on a 12 cm vertical axis with brow at 4 cm, nose base at 8 cm, and chin at 12 cm. Add a headdress band above the brow with three evenly spaced circle ornaments along a 6 cm band, and two drapery folds falling from the neck to the shoulder.

Answer: The profile line runs from brow to chin with equal 4 cm segments. The headdress band curves above the brow, and three circles are spaced evenly along the 6 cm band with equal gaps. Two folds start at the neck and fall outward, shaded lightly in the creases. The final drawing has clear landmarks, a structured headdress, and readable drapery.
