Face Gesture Drawing: Quick Sketches of Expression and Head Tilt

Topic reference / ordinary illustration

Ordinary topic reference. Hypothetical dimensions in the four tasks are supplied in their own text; this illustration is not their measured answer.

Face Gesture Drawing: Quick Sketches of Expression and Head Tilt

Worked example / complete source key

Sketch a face with a slight right tilt and a surprised expression in 30 seconds. Use one brow cue and one mouth cue.

Answer: Draw a slanted axis from crown to chin, leaning right. Place the eye midline perpendicular to the axis. Draw both brows as high arcs. Draw the mouth as a small open oval. The tilt reads as slight right, and the high brows with an open mouth read as surprise.
