Graffiti Alphabet Drawings: Block and Bubble Letter Basics

Original worked example / unchanged complete key

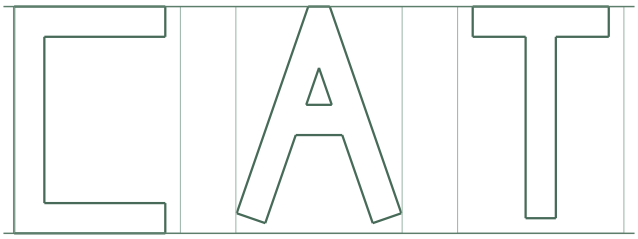

Prompt: Draw the word CAT in block style using three equal-width rectangles. Use a baseline at the bottom, a cap line at the top, and a consistent gap of about one-third of a letter width. Describe the shapes and check the result.

Answer: Draw three rectangles side by side with equal width and a gap of about one-third of a rectangle width. Mark baseline and cap line across all three. In the first rectangle, draw a C as a block shape open on the right: a vertical bar on the left with top and bottom arms. In the second rectangle, draw an A as a triangle with a crossbar, keeping stroke thickness even. In the third rectangle, draw a T as a vertical bar centered under a top horizontal bar. Outline all letters with the same thickness. Check: all letters sit on the baseline, reach the cap line, use even strokes, and have equal gaps. The word reads clearly as CAT.

Original block/bubble word examples / chosen equal frames / actual paper size

Three equal-width frames share baseline and top guide. The selected gap is one third of a frame width; stroke bands have equal thickness.
