Draw a Simple Car: Body, Wheels, and Windows

Topic reference / ordinary illustration

Ordinary topic reference. Hypothetical dimensions in the four tasks are supplied in their own text; this illustration is not their measured answer.

Draw a Simple Car: Body, Wheels, and Windows

Worked example / complete source key

On a 15 cm by 20 cm sheet, draw a side-view car with a body zone 12 cm wide and 5 cm tall, a wheel line 1 cm above the baseline, two wheel centers 3 cm from each end of the body zone, and two equal wheels of 2.5 cm diameter. Add two windows with a 0.5 cm frame gap.

Answer: The construction plate shows a light baseline, a body zone rectangle, and a wheel line. Two wheel centers are marked 3 cm from the left and right edges of the body zone, so the distance between centers is 6 cm. Two equal circles of 2.5 cm diameter are traced on the centers. The body outline is rounded at the corners and has a roof curve. Two rounded-rectangle windows sit inside the body with a 0.5 cm gap. Guide lines are erased, and the final body, wheels, and windows are darkened.
