Draw a Simple Car: Body, Wheels, and Windows

Original tasks 1, 2 / independent work

Task 1

A body zone is 10 cm wide. Wheel centers are 2 cm from each end. What is the distance between the wheel centers?

Task 2

Two wheels have diameters of 2.5 cm and 3 cm. Are they equal? If not, what is the difference?

Draw a Simple Car: Body, Wheels, and Windows

Original tasks 3, 4 / independent work

Task 3

A window is drawn 0.3 cm from the body outline, but the planned frame gap is 0.5 cm. How much farther should the window move inward?

Task 4

A wheel center is marked 1 cm above the baseline, and the wheel diameter is 2 cm. Will the wheel touch the baseline? Explain using the radius.
