Chibi Cat Base Drawing: Oversized Head, Small Body, Clear Proportions

Topic reference / ordinary illustration

Ordinary topic reference. Hypothetical dimensions in the four tasks are supplied in their own text; this illustration is not their measured answer.

Chibi Cat Base Drawing: Oversized Head, Small Body, Clear Proportions

Worked example / complete source key

Construct a standing chibi cat base using a head height of 1 HU and a body height of 0.6 HU. Place the eye line at 0.55 HU from the top of the head, attach ears at the top, place shoulder joints 0.1 HU below the chin line, hip joints 0.1 HU above the body base line, and attach a tail at the lower back. Describe the check.

Answer: Draw the head as a 1 HU oval. Mark the chin line at its bottom. Measure 0.6 HU downward and mark the body base line. Draw a body narrower than the head between these lines. Add a midline, place the eye line at 0.55 HU from the top, and put two eyes with a one-eye-width gap. Add a nose and mouth on the midline. Attach two ears at the top, overlapping the outline slightly. Mark shoulder joints 0.1 HU below the chin line and draw short arms outside the body. Mark hip joints 0.1 HU above the body base line and draw short legs with feet on a ground line. Attach the tail at the lower back near the body base line and curve it outward. Check: head is the largest shape; body height is about 0.6 HU; body is narrower than the head; both feet touch the ground line; no limb crosses the face.
