Contour Flower Drawing: Single-Line Outline and Blind-Contour Practice

Original tasks 1, 2 / independent work

Task 1

Draw a single-line contour flower with four petals, one stem, and one leaf. Start at the center and end at the stem base. Count your pen lifts after the first mark.

Task 2

Perform a blind contour of a flower with six petals for 60 seconds without looking at the paper. Then count how many times your line stopped and restarted.

Contour Flower Drawing: Single-Line Outline and Blind-Contour Practice

Original tasks 3, 4 / independent work

Task 3

Draw two contour flowers on one page: first a blind contour with five petals, then a normal single-line contour with five petals. Write one difference you notice between them.

Task 4

Draw a single-line contour flower with three petals, two stems, and no leaves. State your convention first, then draw. Check that every stem connects to the center.
