Chibi Couple Drawing: Proportions, Poses, and Interaction Cues

Original worked example / unchanged complete key

Prompt: Draw a chibi couple in a side-by-side pose with linked hands. Use a total height of 9 cm per figure, a head of 4 cm, and a body of 5 cm. Mark the contact point at the hands and add one interaction cue: a shared scarf.

Answer: Two chibi figures stand on the same ground line. Each has a 4 cm head circle and a 5 cm tapered body. Their inner arms curve toward a marked contact point at hip height, where the hands overlap. A simple scarf loops from one neck to the other, crossing the contact point. Both faces have curved eyes and small smiles. The head-to-body ratio is the same for both figures, and the scarf is visible between them.
