Devil Wolf Drawing: Horns, Wings, and Snarl

Original worked example / unchanged complete key

Prompt: Draw a devil wolf on a page where the head circle is 5 cm across. The muzzle is one circle diameter long. The body is two head heights tall. Horns curve outward and back, each about 4 cm along the outer arc. Wings span about one and a half body widths on each side. The snarl has a mouth curve wider than the muzzle base and small even teeth.

Answer: A completed light-guide construction with a 5 cm cranium circle, a 5 cm muzzle wedge, a body 10 cm tall, two tapered horns about 4 cm along the outer arc, bat-style wings behind the body, and a snarling mouth with a wide curve and small teeth. Final contours are dark and continuous after erasing guides.
