Dinosaur Skull Drawing: Fenestrae, Tooth Row, and Crest

Original tasks 1, 2 / independent work

Task 1

Draw a skull with two fenestrae and four teeth. Use a hypothetical x-height of 3 cm. Check that each fenestra is enclosed and each tooth starts on the jaw line.

Task 2

Draw a skull with a pointed crest and three fenestrae. Keep the crest connected to the skull and away from the openings.

Dinosaur Skull Drawing: Fenestrae, Tooth Row, and Crest

Original tasks 3, 4 / independent work

Task 3

Draw a skull with a tooth row of eight teeth spaced at a hypothetical 1 cm. Mark the jaw line first, then place teeth.

Task 4

Draw a skull and then erase all construction guides. Label fenestrae, tooth row, and crest lightly. Check that the skull still reads clearly without guides.
