Fursuit Drawing: Head, Paws, and Suit Proportions

Original tasks 1, 2 / independent work

Task 1

A head has a midline height of 2 units from baseline to midline and a crown height of 3 units above the midline. What is the total head height?

Task 2

A paw palm is 4 units wide and 2 units high. A wrist cuff is 3 units wide. Is the cuff narrower than the palm as required?

Fursuit Drawing: Head, Paws, and Suit Proportions

Original tasks 3, 4 / independent work

Task 3

A suit plan uses upper arm 3 units, forearm 2 units, and paw 1 unit. The planned total limb length is 6 units. Is the plan consistent?

Task 4

A drawing uses a head height of 6 units and a torso of 4 units. A second drawing of the same suit uses a head height of 3 units. What torso value keeps the same ratio?
