Draw a Haughty Expression: Chin Lift, Lidded Eyes, and Subtle Cues

Original worked example / unchanged complete key

Prompt: A student draws a face with the chin lifted by two centimeters on a ten-centimeter face, eyelids covering half the iris, inner brow lowered slightly, outer brow level, and mouth corners curled up by three millimeters. Check the drawing against the five-item checklist.

Answer: The drawing passes all five items: chin lifted, eyes half-lidded, inner brow lowered, mouth curled, and expression restrained. The chin lift is a hypothetical example and is consistent with the convention. No exaggeration is present, so the drawing is valid.
