# Animal Contour Drawing: Blind Contour and Edge Tracing Practice

Original task 1 / independent drawing and calculation

## Task 1

Draw a cat outline from the nose to the tail using one continuous line. If you have a printed plate, start at the nose arrow and stop at the tail arrow; otherwise, lightly sketch a simple cat outline first, then draw over it in one line. Do not lift the pencil. After drawing, count the breaks.

Keep the original task measurements. Use the full drawing sheet in this PDF for a response needing more room; use the stated paper size when a task specifies larger paper.

# Animal Contour Drawing: Blind Contour and Edge Tracing Practice

Original task 2 / independent drawing and calculation

## Task 2

Blind contour: cover your paper, look only at a dog outline (a printed plate or a photo placed in front of you), and draw its edge as one line without looking at the paper. Uncover and mark one place where your line lost the edge.

Keep the original task measurements. Use the full drawing sheet in this PDF for a response needing more room; use the stated paper size when a task specifies larger paper.

# Animal Contour Drawing: Blind Contour and Edge Tracing Practice

Original task 3 / independent drawing and calculation

## Task 3

Edge tracing: trace a faint bird silhouette from the beak arrow to the tail arrow with one unbroken line. If you have no printed silhouette, lightly sketch a simple bird outline first, then trace it in one darker line. If you drift off the edge, return to the last correct point without starting over. Count drifts.

Keep the original task measurements. Use the full drawing sheet in this PDF for a response needing more room; use the stated paper size when a task specifies larger paper.

# Animal Contour Drawing: Blind Contour and Edge Tracing Practice

Original task 4 / independent drawing and calculation

## Task 4

Measure your paper and pencil. Mark a baseline and a midline on your own paper, then record a hypothetical example: an animal ear is 5 centimeters from your marked baseline to your marked midline. Draw the ear edge as one line and state whether the line is unbroken.

Keep the original task measurements. Use the full drawing sheet in this PDF for a response needing more room; use the stated paper size when a task specifies larger paper.

## Full drawing sheet / reusable blank workspace

Reusable full drawing sheet for Tasks 1 to 4. Print another copy when needed. Keep all original task measurements; if a task specifies larger paper, use that paper size.
