Draw and Compare Five Face Shapes with Proportion Guides

Original task 1 / independent drawing and calculation

Task 1

Using H = 10 cm, state the eye-line height and the nose-line height if the nose-line is one third of the way from the eye-line to the chin.

Keep the original task measurements. Use the full drawing sheet in this PDF for a response needing more room; use the stated paper size when a task specifies larger paper.

Draw and Compare Five Face Shapes with Proportion Guides

Original task 2 / independent drawing and calculation

Task 2

A square face and a heart face both use H = 12 cm. The square jaw width is 8 cm and the heart jaw width is 4 cm. The eye-line is at 6 cm. Which jaw is closer to eye width, and by how much?

Keep the original task measurements. Use the full drawing sheet in this PDF for a response needing more room; use the stated paper size when a task specifies larger paper.

Draw and Compare Five Face Shapes with Proportion Guides

Original task 3 / independent drawing and calculation

Task 3

On a 12 cm face, eye centers are 2 cm apart. If you move each eye center 1 cm outward from the centerline, what is the new separation, and does it still fit the one-eye-width rule?

Keep the original task measurements. Use the full drawing sheet in this PDF for a response needing more room; use the stated paper size when a task specifies larger paper.

Draw and Compare Five Face Shapes with Proportion Guides

Original task 4 / independent drawing and calculation

Task 4

You draw an oblong face with H = 14 cm and a round face with H = 14 cm. The oblong jaw width is 7 cm and the round jaw width is 9 cm. The eye-line is at 7 cm. Which shape reads wider at the jaw, and by how much?

Keep the original task measurements. Use the full drawing sheet in this PDF for a response needing more room; use the stated paper size when a task specifies larger paper.

Full drawing sheet / reusable blank workspace

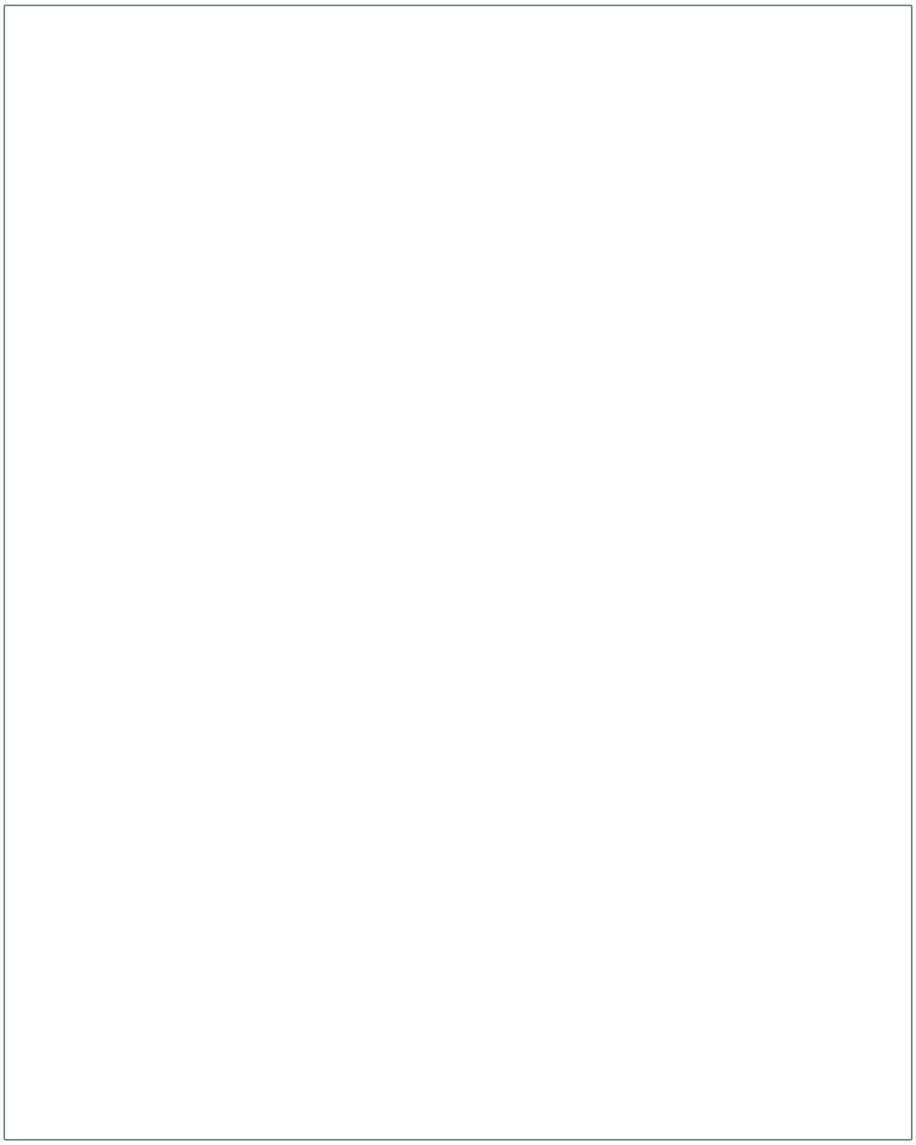

Reusable full drawing sheet for Tasks 1 to 4. Print another copy when needed. Keep all original task measurements; if a task specifies larger paper, use that paper size.

Draw and Compare Five Face Shapes with Proportion Guides

Task 1 / practice

Five face outlines / chosen worksheet conventions, NOT anatomical standards

Independent drawing area / record your own construction and checks.

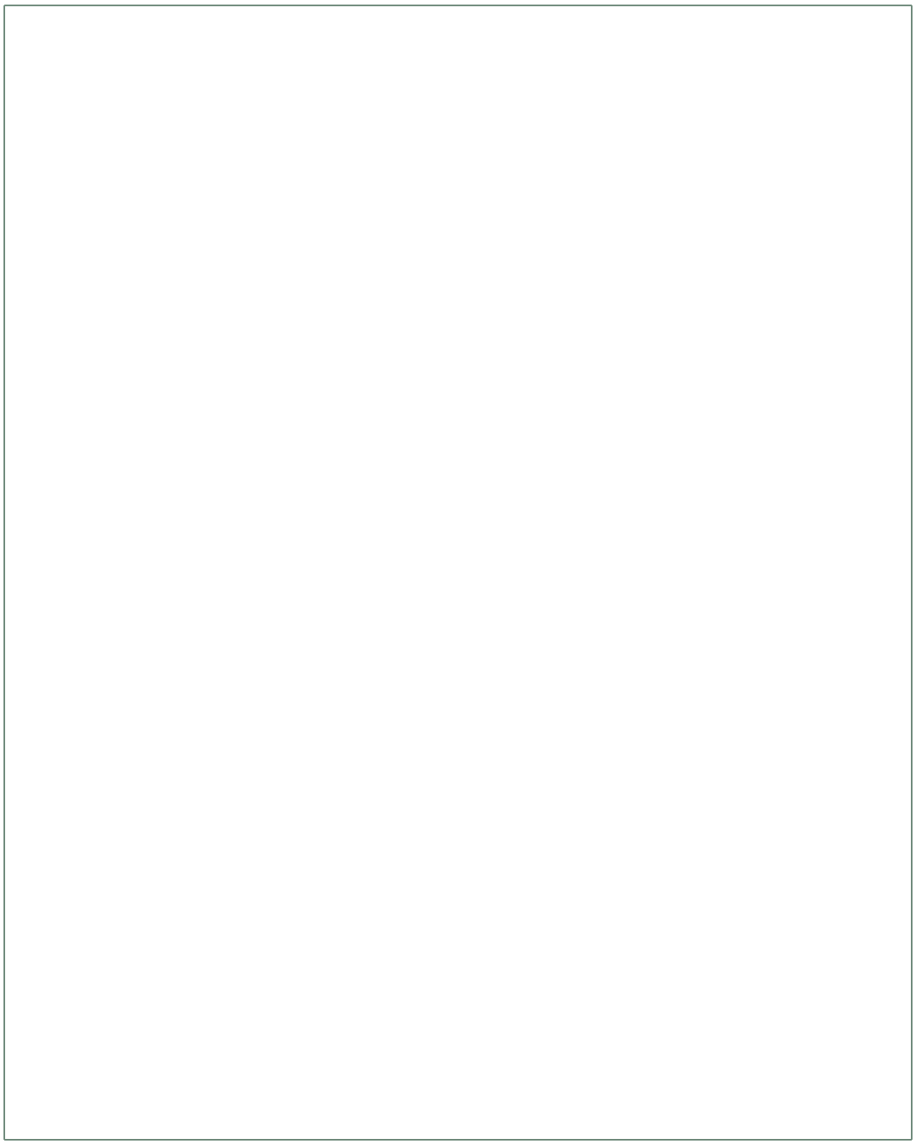

Draw and Compare Five Face Shapes with Proportion Guides

Task 2 / practice

Five face outlines / chosen worksheet conventions, NOT anatomical standards

Independent drawing area / record your own construction and checks.

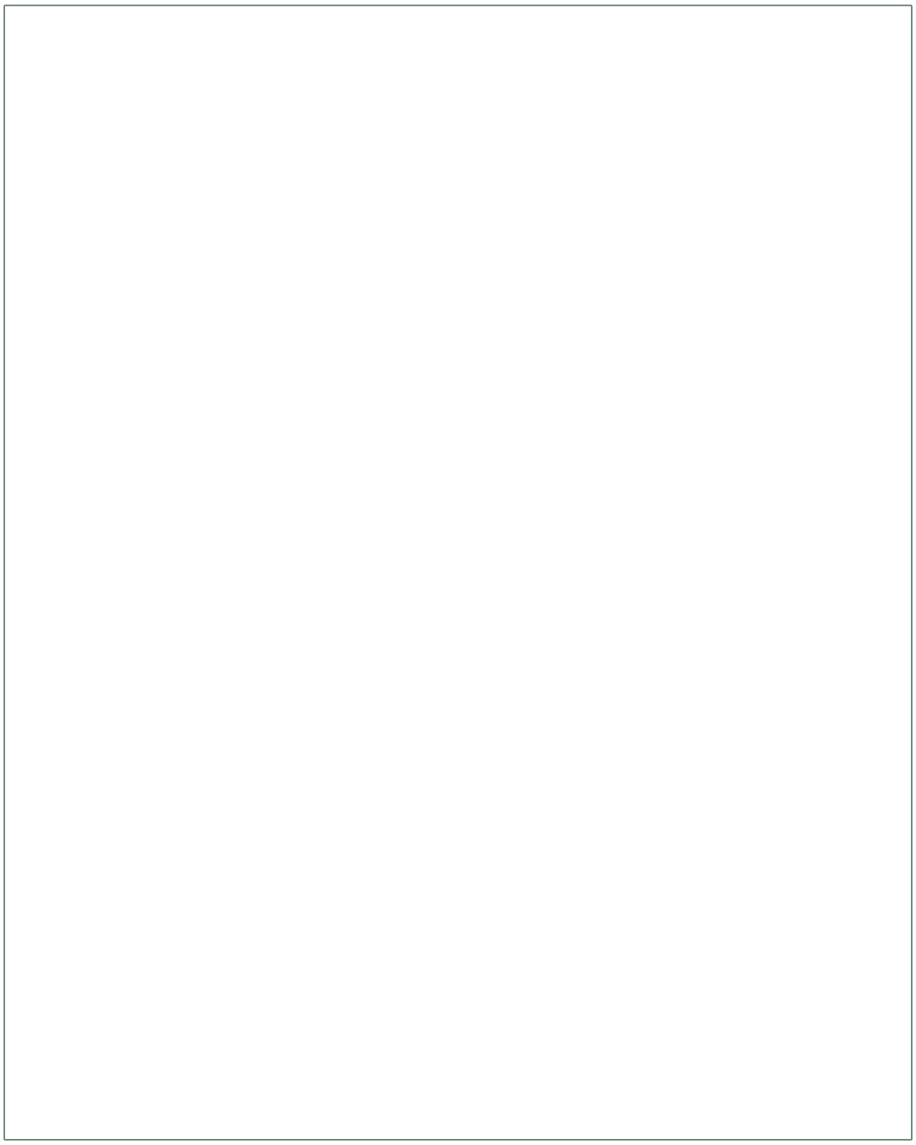

Draw and Compare Five Face Shapes with Proportion Guides

Task 3 / practice

Five face outlines / chosen worksheet conventions, NOT anatomical standards

Independent drawing area / record your own construction and checks.

Draw and Compare Five Face Shapes with Proportion Guides

Task 4 / practice

Five face outlines / chosen worksheet conventions, NOT anatomical standards

Independent drawing area / record your own construction and checks.
