Hair Down Drawing: Loose Fall and Shoulder Drape Comparison

Original task 1 / independent drawing and calculation

Task 1

Draw a head outline 5 units wide and 7 units tall. Add three fall lines from the crown to below the shoulder line with no shoulder contact. Each clump should be 2 units wide at the root and 1 unit wide at the tip. Label the root and tip of one fall line.

Keep the original task measurements. Use the full drawing sheet in this PDF for a response needing more room; use the stated paper size when a task specifies larger paper.

Hair Down Drawing: Loose Fall and Shoulder Drape Comparison

Original task 2 / independent drawing and calculation

Task 2

Draw a shoulder outline with a slope on each side. Add two fall lines that stop above the shoulder and two fall lines that meet the shoulder and bend along its slope. Mark each contact point with a small dot and write one sentence describing the direction change.

Keep the original task measurements. Use the full drawing sheet in this PDF for a response needing more room; use the stated paper size when a task specifies larger paper.

Hair Down Drawing: Loose Fall and Shoulder Drape Comparison

Original task 3 / independent drawing and calculation

Task 3

Create two side-by-side head outlines of equal size, 6 units wide and 8 units tall. On the left, draw four straight loose fall clumps. On the right, draw four shoulder drape clumps with two contact points. Use the same clump widths on both sides: 2 units at the root and 1 unit at the tip. Write one comparison note under each study.

Keep the original task measurements. Use the full drawing sheet in this PDF for a response needing more room; use the stated paper size when a task specifies larger paper.

Hair Down Drawing: Loose Fall and Shoulder Drape Comparison

Original task 4 / independent drawing and calculation

Task 4

Draw one head outline and add five fall lines. Three fall lines should show straight loose fall, and two should show shoulder drape with contact points. Label each fall line as straight or draped. Then list the tip direction of each fall line in one short line of text.

Keep the original task measurements. Use the full drawing sheet in this PDF for a response needing more room; use the stated paper size when a task specifies larger paper.

Full drawing sheet / reusable blank workspace

Reusable full drawing sheet for Tasks 1 to 4. Print another copy when needed. Keep all original task measurements; if a task specifies larger paper, use that paper size.
