Ink Bird Drawing: Feather Strokes, Beak Shapes, and Line-Weight Control

Original tasks 1, 2 / independent work

Task 1

Draw a reference strip with three zones: short, medium, and long. Make five strokes in each zone that taper toward the tip. Add direction arrows.

Task 2

Draw three head circles and add a cone, hooked, and flat beak. Mark the gape line on each.

Ink Bird Drawing: Feather Strokes, Beak Shapes, and Line-Weight Control

Original tasks 3, 4 / independent work

Task 3

Make a five-mark line-weight sample bar on your paper. Label pressure and speed for each mark. Hold it at arm's length and confirm five distinct weights.

Task 4

Draw a small bird study using one beak plan, short body feathers, and medium wing coverts. Firm the beak outline and check the three questions from the lesson.
