Latte Art Drawing: Cup Rim, Foam Contrast, and Pour Patterns

Original worked example / unchanged complete key

Prompt: Draw a heart pattern inside a cup rim ellipse with a contrast map. Use a hypothetical cup opening 10 cm wide and 4 cm deep. Place the heart centered, with its top curve 1 cm below the rim's top edge and its point 1 cm above the rim's bottom edge. Show three tonal zones.

Answer: Draw an ellipse with major axis 10 cm and minor axis 4 cm. Mark the center and a vertical centerline. Sketch a heart: two symmetric arcs meeting at a point at the bottom, top curve rounded. Keep the heart inside the ellipse with 1 cm margins top and bottom. Map contrast: unshaded light foam inside the heart, light hatching in a ring around it, dense cross-hatching near the rim. Check symmetry by measuring from the centerline; check contrast by squinting so the heart reads as a light shape against darker foam.
