Easy Drawing of Noodles: Bowl, Strands, and Chopsticks

Original worked example / unchanged complete key

Prompt: Draw a bowl with an elliptical rim, five noodle strands, two parallel chopsticks at 30 degrees from horizontal, and light broth shading. Use a 2:1 rectangle guide for the rim.

Answer: The rim ellipse is drawn inside a 2:1 rectangle. Five S-curve strands enter the bowl, with two crossing strands in front. Two chopsticks are parallel at 30 degrees, tips inside the rim. Broth is shaded lightly with three unshaded patches, and two steam wisps rise above.
