Petunia Drawings: Trumpet Petal Construction and Bloom Clusters

Original worked example / unchanged complete key

Prompt: Draw one petunia bloom with a 6 cm by 5 cm face oval, a centered 2 cm by 1.5 cm throat oval, five seam lines, and scalloped rim. Shade throat darkest and rim lightest.

Answer: A completed bloom shows a light face oval, a smaller centered throat oval, five curved seams reaching the rim, scallops between seams, and a value gradient from dark throat to light rim. The trumpet reads as a funnel when squinting.
