See No Evil Drawing: Three Wise Monkey Poses with Hand Placement

Original worked example / unchanged complete key

Prompt: Draw a see-no-evil pose on paper where the head oval is 4 cm tall and the shoulder line is 2 cm below the chin. Place the covering hand so the palm center sits on the eye line and the fingertips reach the top of the head oval. State the palm width you will use and check the wrist position.

Answer: Using a hypothetical palm width of 2 cm and a head oval width of 4 cm, draw the palm as a 2 cm by 2.5 cm rounded rectangle centered on the eye line. The eye line is 2 cm below the top of the 4 cm oval. The eye line is 2 cm below the top of the oval; the palm top is 1.25 cm above the eye line, so extend the fingers the remaining 0.75 cm to the top edge. The eye line to shoulder line distance is 4 cm (2 cm from the eye line to the chin plus 2 cm from the chin to the shoulder line). The bottom of the 2.5 cm tall palm sits 1.25 cm below the eye line, so the wrist extends about 2.75 cm from the bottom of the palm down to the shoulder line. Check: palm center is on the center line, palm width is half the head width, and the wrist meets the shoulder line.
