Draw a Flowering Tree: Blossom Clusters and Branch Spread

Topic reference / ordinary illustration

Ordinary topic reference. Hypothetical dimensions in the four tasks are supplied in their own text; this illustration is not their measured answer.

Draw a Flowering Tree: Blossom Clusters and Branch Spread

Worked example / complete source key

A student draws a trunk 10 cm tall and a crown boundary 8 cm wide with 12 clusters: 6 inner, 3 middle, 3 outer. Identify two problems and state a fix for each.

Answer: Problem one: crown width (8 cm) is less than trunk height (10 cm), so the spread is too narrow. Fix: widen the boundary to about 12 cm. Problem two: inner zone has 6 clusters while outer has 3, reversing the intended depth ratio. Fix: move 3 clusters from inner to outer, giving 3 inner, 3 middle, 6 outer.
