Piccolo Drawing Guide: Body, Keys, and Embouchure Outline

Original worked example / unchanged complete key

Prompt: Draw a piccolo using an 18-unit body length. Place the embouchure center 2 units from the top, start the front key rail at 6 units, place four front keys 2 units apart, and flare the footjoint at 15 units. Describe the result.

Answer: The body tapers from a narrow headjoint to a slightly wider footjoint. The embouchure oval sits 2 units from the top, centered on the axis, with a thin lip plate outline. The front rail guide runs from 6 to about 14 units, with four key circles at 6, 8, 10, and 12 units spaced 2 units apart. A side rail holds three smaller keys offset by 1 unit. The footjoint flares at 15 units. Line weights separate body, keys, and guides, and the embouchure remains unshaded.
