Easy Drawing of Pins: Safety Pin Clasp and Sewing Pin Head

Original worked example / unchanged complete key

Prompt: Draw a safety pin with a total length of 6 x-heights, a coil 1 x-height wide, and a clasp 1.5 x-heights long. Use an x-height of 10 mm for this example.

Answer: The safety pin is about 60 mm long. The coil is about 10 mm wide. The clasp is about 15 mm long. The two arms are separated by about 5 mm at the middle. The top arm ends inside the clasp cup, and the point tapers into the cup.
